

The Wissenschaftliche-Technische Arbeitsgemeinschaft für Bauwerkserhaltung und Denkmalpflege e. V. [Scientific-Technical Work Group for the Preservation of Buildings and Monuments] herewith certifies that the company

Remmers Baustofftechnik GmbH

has presented the results of the test on the effectiveness of **injection materials** according the *WTA Code of Practice 4-4-04* and the results were inspected by the *WTA Examination Board for Injection Materials*.

The test on effectiveness was executed by a testing institute recognized by WTA for injection materials.

The following injection material passed the test for effectiveness with the application parameter described in Test Certificate No. ...M..107.2 dated 07.03.2007 and thus fulfils the requirements of the WTA Code of Practice 4-4-04:

Kiesol, Art. No. 1810

The product may be marked with the service logo

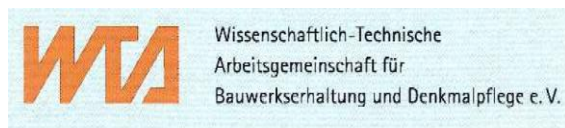

This Test Certificate is not transferable to other injection materials.

Upon application, the validity period may be extended in accordance with *WTA Code of Practice 4-4-04*.

On behalf of the WTA Managing Board
