

Advantages which are easy to see

[1] Cut and scratch resistant
The easy care Zydrit flooring system withstands high mechanical stress (resistant to scratching) – all that remains is a brilliant impression.

[2] Flawless beauty
While other flooring systems such as laminates or vinyls are susceptible to damage which is hard to remove – e.g. from dirt penetration or moisture – the jointless Zydrit flooring has no place for such weak points!

[3] Always on the level
A good thing we do not need to apply it thickly. The low thickness required (< 2 mm) simply makes additional works such as adjusting door heights etc. unnecessary during refurbishment. This saves time, money and your nerves. Just right!

[4] Definitely the right decision
So that you can breathe easily, Zydrit – like the whole Remmers flooring range – complies with the latest EU VOC requirements. So you can have a clear head for the important things!

Also free from emissions, plasticizers and solvents under the strict criteria laid down by the AgBB (Swiss Commission for Health Assessment of Building Products).

A quality floor does not have to be costly – either in time or money

The base must be right, so the first step is to clean and prime the surface. Then the prepared, non pigmented mix is applied.

The Zydrit® flooring is spread evenly with a serrated trowel using quick strokes.

The surface is levelled with a special roller and smoothed to a uniform finish.

Finally, after its rapid hardening, the top surface protection is applied. The result is striking because of the unique 3D depth effect that this creates.

This way your Zydrit® floor stays timelessly beautiful – at minimum expense

(1) Sand
The floor is uniformly sanded (even stubborn dirt and deep damage can be removed).

(2) Reseal
The floor is then quickly and easily resealed.

(3) Finished
The Zydrit flooring from Remmers is good as new again for a long time.

Silk grey (ZY 297)

Also: Additional non-standard colours are available on request. Experience shows that printing inks cannot accurately reproduce the actual range of colours available. We recommend that you ask Remmers Technical Service Department to show you actual samples of the products. They will be pleased to assist you.

Unique design for brilliant opportunities

The innovative Zydrit flooring leaves a lasting impression with every step – and not just because of the fascinating 3D depth effect. Taking the long term view is where this unique system, exclusive to Remmers, meets the highest standards. Neither scratches nor traces of wear are noticeable at first glance because the coloured layer is not affected, even under heavy usage. And with a choice of 15 base colours, no creative wishes are impossible. Individual design concepts can be achieved with a whole variety of colour combinations – on almost any substrate. For refurbishment works you can always lay the right foundations with this system. Simply let yourself be inspired by the multiple choice and unlimited opportunities.

Industrial areas

The basis for good business
A comprehensive range of integrated colour possibilities provides clear room layouts and designated areas with individual colour concepts.

Storage areas

New ideas for every requirement
Frequent daily pedestrian traffic and constant use still leaves almost no visible traces on the surface of the resistant Zydrit flooring.

Waiting and reception areas

Despite refurbishment: Minimal service disruption. It is easy and quick to install Zydrit flooring on many substrates – without the time and expense of removing and disposing of the old flooring.

Trade fairs and exhibition areas

Our best exhibit. Even when traces of heavy wear or damage eventually appear, the Zydrit flooring can soon regain its former glory. Simply do the same as with wooden floors. Sand, reseal and it's finished.

Restaurants and public buildings

Fast service included
For use in refurbishment and in new construction: The high-quality Zydrit flooring always gives good service. It can be laid in minimal time.

Large areas with heavy public use

For a quality appearance
Easy care, chemically and UV resistant: With these properties the high performance Zydrit flooring can always shine in public – every single day.
