

## REFERENCE

# Police Custody Cells, Norfolk & Suffolk

### Application Field

- Wall coatings

### Structure Type

- Other public buildings - Police Cells

### Brief Description

A number of custody cells and corridors throughout 6 police stations required refurbishment to the walls.

### Main Problem and Requirements

The coatings needed to be tough, durable, hygienic, easy to clean and chemically resistant. The precast concrete wall panels were primed with Epoxy BS2000. The blow holes were then filled with Multifiller and sealed with two coats of Epoxy BS3000. This system was used throughout the cells and corridors within the custody areas.

### Client

Police Custody Service

### Completion

2010

### Products and Systems Used

Epoxy BS2000  
Multifiller  
Epoxy BS3000
