

## REFERENCE

# Vineyard, Austria

### Application Field

- Waterproofing buildings –special areas

### Structure Type

- Other buildings

### Brief Description

Various bund areas for wine production waste, concrete frames.

A chemically resistant coating to coat, waterproof and re-profile the holding tanks.

### Main Problem and Requirements

Concrete corrosion and pitting caused by chemical attack.

A wide range of pH is held in the tanks, therefore a system offering full range chemical resistance was selected – SD1.

### Client

Henschke, Austria

### Completion

2009

### Products and Systems Used

SD1
