

## REFERENCE

# Karlsruhe Castle, Karlsruhe, Germany

### Construction measure

- Facade restoration / render

### Type of object

- Castles / forts

### Brief description

A very large number of Remmers products were used at this well-maintained castle which is probably the most beautiful in the German State of Baden. Even the statues in the park-like garden were restored to their original beauty with Alkutex cleaning agents. The facade was cleaned (partial areas) with Alkutex products and the facade coated (partial areas) with the Funcosil Silicone Resin Paint System.

### Product systems used / Size

#### Facade restoration / render

Facade cleaning (partial areas): Alkutex products  
Coating (partial areas): Silicone Resin Paint System LA
