

REFERENCE

Gate Cottage, Hampshire

Application Field

- Interior Insulation

Structure Type

- Residential housing

Brief Description

Installation of waterproofing and internal vapour permeable insulation system to the ground floor extension of a residential house.

Main Problem and Requirements

The concrete walls and floor areas of the basement required leveling & waterproofing. Following on the next day from the waterproofing works, the walls were insulated with the iQ-Therm 50 system, prior to being painted with iQ-Paint.
