

## REFERENCE

# Mansion, Staßfurt

### Application Field

- Insulation

### Structure Type

- Historically protected / historically valuable buildings

### Brief Description

The city of Staßfurt houses this historic mansion which were a focal point of the city of old Staßfurt. The beautiful facades of the houses have not been touched since the late 70s. Internally, the Mansion boasts high ceilings and dark hallways and there is a requirement to improve on the energy loss of the building.

### Main Problem and Requirements

The 100 year old buildings, with very low heat sources need to be brought in line with the technology of the 21<sup>st</sup> century whilst preserving the historic facades.

### Client

WOBAU Wohnungs

### Specifier

Christian Boos - Architect
