

REFERENCE

St John's School, Rieste

Application Field

- Insulation

Structure Type

- Schools / universities / museums
- Historically protected / historically valuable buildings

Brief Description

The Samtgemeinde Bersenbrueck operates many schools in the main community and bordering villages. St John's School was built in 1915 and has been effectively updated to meet the energy efficiency requirements.

Main Problem and Requirements

Defective and insufficient insulated exterior walls were resulting in high energy costs. The building required renovation without changing the original structure.

Client

Samtgemeinde Bersenbrück

Specifier

Planungsbüro
