

## REFERENCE

# Villa on Muhlentor, Greifswald

### Application Field

- Insulation

### Structure Type

- Historically protected / historically valuable buildings
- Other buildings

### Brief Description

The "entrance" to the historic old city of Greifswald is through the Villa on Muhlentor. This also includes the Villa 'AM Mill Gate 2", which for the last 90 years was used as a dental lab but has stood empty for nearly a decade. As part of the renovations to the Day Hospital, the interior insulation required attention from the basement to the roof.

### Main Problem and Requirements

For more than 9 years of standing vacant, the building required total energy efficient renovations to meet with the required standards of the Planning Society to keep in line with the overall historical picture and the urban renewal for future use.

### Client

Bauherrengemeinschaft

### Specifier

Haus and Stadterneuerung mbH

### Products and Systems Used
