

# Closures Limited Mansfield, Nottinghamshire

Closures Limited are a specialist injection moulding company, who produce food container closures for heat sealing in the food packaging markets. Their products are now used for sealing the plastic milk, juice and other liquid products, for almost all of the major UK retailers.

Three years ago, Closures opened their first plant in Mansfield, and today this has almost doubled in size, with a major extension allowing the Company to gain a significant share of the UK market.

With such demanding clients and high volume production, the Remmers resin floors selected for the first factory in 2002, have proved to be a very sound base for their success and profitable growth.

Closures had needed a floor that was hygienic, easy to clean and yet also resistant to abrasion and wear from frequent fork lift traffic and plastic pallets.

This was provided by Remmers Floormix epoxy system, which also provided a slip resistant and attractive, decorative finish.

So when the major extension was planned by Burrel Limited, the design and build contractors, Closures Managing Director, Peter Acres, insisted on Remmers flooring again.

However this time there was another onerous requirement from the necessary 'Fastrak' construction programme: - The floor had to be applied onto the new concrete slab soon after it had been laid, whilst it still had a high residual moisture content.

No problem for the advanced and unique Remmers Floormix systems!

Remmers MT Primer was applied directly on the new concrete to provide a surface damp-proof membrane (dpm), without any risk of future blistering or delamination. The complete

system from surface preparation to final sealing and curing, was professionally completed within a week by specialist flooring contractors, Industrial Floor Treatments (Stone) Limited.

## Project Details

### Application:

Industrial Flooring

### Market:

Manufacturing: Food Industry - Packaging

**Total Area:** 3000m<sup>2</sup>

### Design and Build Contractor:

Burrel Limited

### Client:

Closures Limited

### Contractor:

Industrial Floor Treatments (Stone) Limited
