## Description

A new car bodyshop was to be constructed on an existing industrial estate. Conversion of the existing building was required to ensure the floor suface was non-dusting and durable to withstand regular vehicle movements.Over 1500m2 of floor area was to betreated.

## Problem

The concrete surface was dusting and creating an unhygienic working environemnt. As part of the overall fit-out, dust sealing coating was requried to a specific Bristish Stadnard 4800 colour to meet the clients deisgn criteria for a state of the art facility. A number of spray booths were to be in use and the floor coating needed to be chemically resistant to a number of solvent based chemicals which form part of the working operation.

## Product systems / sizes used

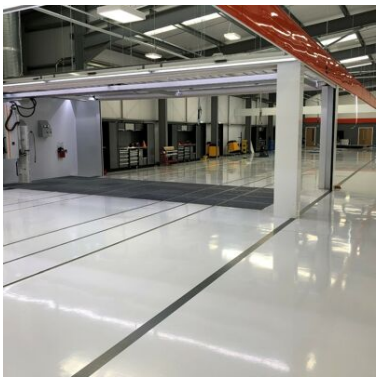

› **Epoxy Flex PH**
Art. No. 6250

› **Epoxy MT 100**
Art. No. 0936
