  No

Description

Buss Fertiggerichte GmbH is a leading producer of ready meals in tins and trays, as well as chilled ready meals. Established in 1938, this Ottersberg-based company now produces more than 1.4 million portions of food every day. Its food production facilities are some of the most cutting-edge in Europe.

Problem

The floor in the Ottersberg plant must be able to withstand thermal and chemical stresses. Since Buss is a food processing company, hygiene is also a vital factor, with resistance to chemicals being essential.
