Description

Charles Hurst Ferrari are the official Ferrari dealer in Northern Ireland and to compliment their recent showroom a new “high Tech” workshop has been constructed.

Problem

The existing old concrete floor in the workshop was constructed in several slabs and therefore a high potential for movement existed. The floor required filling and levelling prior to the application of the flexible surface finish. The system proposed by Remmers was a flexible 3mm visco elastic PUR resin system with a polyurethane seal coat. The seal coat has integral R11 slip rating and a high degree of chemical resistance.

Product systems / sizes used

› Epoxy FAS 100
Art. No. 0916

› Selectmix SBL DF
Art. No. 6751

› PUR Top M Plus
Art. No. 6735
