  , 89231 Neu-Ulm
- **Date / Completion**
  2011
- **Viewing possible?**
  No

Description

After 19 months of construction, the Ratiopharm-Arena was officially opened on December 09, 2011. Special attention was paid to the colour design of the corridors and grandstand walkways. With an action area of 1,989 m², a height of 19 metres and its general multi-functionality, the arena claims to be able to host events of all kinds, such as boxing competitions, basketball games, trade fairs and concerts.The arena can accommodate between 5,500 and 9,000 people for concerts, and for basketball games up to 6,200 seats are available.

Problem

The floor in the Ratiopharm-Arena was designed with a coloured PU-coating with a flake scattering. Despite the transparent sealing, UV stability had to be guaranteed. As there is room for up to 9000 people in the arena, the floor is exposed to high mechanical stress. This is also the reason for the non-slip surface which must be present to ensure the safety of the visitors.

Product systems / sizes used

› Epoxy ST 100

Art. No. 1160

› PUR Uni Color

Art. No. 6800

› PUR Aqua Top 2K SG

Art. No. 3681

› Articoflake

Art. No. 6720
