### Description

The Weserpark shopping centre recently became home to Bremen's largest EDEKA. Spread over an area of 6,800 square metres, customers can find anything their hearts desire. The designer floor finish helps to create an all-round enjoyable shopping experience.

---

### Problem

It was important to create a floor that would score high points not just for design but also for durability. It would also have to be slip resistant and easy to clean. Defects in the existing floor were patched up using Betofix R4 and Betofix HQ3. The substrate was then primed, laminated, coated and sealed using a variety of Remmers products. All the products used feature exceptional mechanical and chemical durability, slip resistance and UV resistance. A fast-drying primer was used to save time during the work.
