Description

Two house on prime location, Shrewsbury Road in Dublin have been adjoined. As part of the refurbishment energy efficiency was considered paramount. Shrewsbury Road is a street in Dublin, Ireland, and was the sixth-most-expensive street in the world in 2007.

Problem

The solid wall construction gave architects Brazil associates a requirement to use a Breathable insulation system to eliminate interstitial condensation. Remmers IQ Therm was chosen as it gives a high level highest level of insulation whilst maintaining breathability. Remmers iQ-Therm 80 is a complete system of fixing/insulation and finishing available in 3 board thicknesses. The system was installed by Contractor Whelan and O' Keeffe.

Product systems / sizes used

› **iQ-Therm 80**
Art. No. 0243
