- **Client**
  Mullarkey Pedersen Architects
- **Viewing possible?**
  No

Description

St Swithin's Parish Church lies at the heart of Magherafelt, Northern Ireland.

Problem

The sandstone detail work had suffered from erosion and freeze thaw damage over the years. The use of Remmers RM reduced the amount of replacement stone ensuring authenticity and reduced costs. Repairs and existing sandstone was then treated with Remmers Funcosil SL.

Product systems / sizes used

› **Funcosil SL**
Art. No. 0608

› **RM**
Art. No. 0750
